

MODULE END ASSIGNMENT: 01

CREATING A PORTFOLIO USING HTML, CSS & BOOTSTRAP

This documentation provides a comprehensive guide for creating a professional and responsive portfolio website using HTML, CSS, and Bootstrap 5. The steps below outline the process, recommended structure, and key features to include for an effective portfolio.

1. Introduction

A portfolio website is essential for showcasing your skills, projects, and experiences to potential employers or clients. Using HTML for structure, CSS for styling, and Bootstrap for responsiveness ensures your portfolio is modern, visually appealing, and accessible across devices.

2. Project Structure

Organize your project files for clarity and maintainability:

- index.html – Main HTML file
- style.css – Custom CSS styles
- /images – Folder for images and project screenshots
- /assets – Additional assets (icons, fonts, etc.)

3. Setting Up the Environment

- Download and include Bootstrap 5 via CDN in your HTML `<head>` section.
- Link your custom CSS file after Bootstrap for overriding styles.

```
<link
href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/css/bootstrap.
min.css" rel="stylesheet">
<link rel="stylesheet" href="style.css">
```

4. Portfolio Website Layout

A standard portfolio includes the following main sections:

Section	Purpose
Header	Branding, navigation, and quick introduction
Home/Hero	Your name, tagline, and call-to-action
About	Brief bio, skills, and experience summary
Skills	Visual representation of technical and soft skills
Portfolio	Showcase of projects with images, descriptions, and links
CV/Resume	Downloadable resume or professional highlights
Testimonials	(Optional) Client or peer feedback
Contact	Contact form or contact details
Footer	Copyright, social links, and additional navigation

5. Detailed Implementation Steps

A. Header & Navigation Bar

- Use Bootstrap's navbar component for a responsive navigation bar.
- Include your logo or name and navigation links to each section.

B. Home/Hero Section

- Large, visually striking section with your name, a brief tagline, and a call-to-action button (e.g., "View My Work").
- Optionally, add a background image or gradient.

C. About Section

- Use Bootstrap's grid system to arrange your photo and a short bio side by side.
- List your experience, education, or a summary of your professional journey.

D. Skills Section

- Display your skills using Bootstrap cards, progress bars, or icons.
- Group skills by category (e.g., Frontend, Backend, Tools).

E. Portfolio Section

- Use a responsive grid layout to showcase projects.
- Each project card should include an image, title, description, and links

F. CV/Resume Section

- Provide a downloadable resume (PDF link) or display key career milestones.
- Use a vertical timeline or table for clarity.

G. Testimonials (Optional)

- Use Bootstrap carousel or cards to display client or peer feedback.

H. Contact Section

- Include a contact form (name, email, message) styled with Bootstrap's form components.
- Optionally, add your email, phone, and social media links.

I. Footer

- Simple footer with copyright, social icons, and navigation links.
- Use Bootstrap's grid system for layout.

J. Responsive Design

- Bootstrap's grid and utility classes ensure your site is mobile-friendly by default.

6. Folder Structure

```
/portfolio-website/  
|-- index.html  
|-- style.css  
|-- /images/  
    |-- profile.jpg  
    |-- project1.jpg  
    |-- ...  
|-- /assets/  
    |-- fonts/  
    |-- icons/
```

7. Reference

Portfolio Link: <https://madhu-mamidala.github.io/my-portfolio.github.io/>

8. Submission Format: Hosting on GitHub

- Create a GitHub repository for your portfolio assignment.
- Upload your HTML, CSS, and Bootstrap files to the repository.
- Ensure your portfolio is publicly accessible.
- Share the GitHub repository link as your submission.

9. Evaluation Criteria:

S.no	Criteria	Marks
1	Code Quality	5
2	Implementation	10
3	User Interface	5
4	Error Handling	3
5	Documentation	2

10. Conclusion

By following this step-by-step guide, you will not only build a modern, responsive, and visually appealing portfolio website, but also gain hands-on experience in structuring and styling real-world web projects using HTML, CSS, and Bootstrap. This assignment is a reflection of your technical capabilities, creativity, and attention to user experience — all of which are

critical to impressing potential employers or clients. Treat this portfolio as a living document that evolves as you grow, learn, and build more impactful projects.
